

STATIONARY HIGH PRESSURE WATERJET DISTRIBUTION NETWORKS
FROM 100 UP TO 3000 BAR

Reliable stationary high pressure waterjet networks.

- Stationary networks offer safety to the workers.
- Easy access to high pressure water in each work place.
- Improvement in the working time .
- No damage in the hoses.
- Economy due to significant lower consumption of hoses-nipples.

The construction of the networks offers full safety.

Apart from high pressure network there are and electric networks for controlling the pump, High Pressure ON-OFF.

All the connections of the hoses are protected with strain relief devices.

All the elastic hoses are protected with UV protection cover and steel pipelines.

All parts are made of stainless steel.
